Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner called to clarify ambiguities with the language of claims 1 and 10. In particular, claim 1 was discussed to clarify a double inclusion of a plate body and a supported portion being between the locking body and the shaft joint at the same time. Claim 10 was discussed to clarify that a projection is respectively fitted in the shaft joint body and the locking body and not that one projection fits in both the locking body and the shaft joint. A clean copy of revised claim 1 was provided to the examiner via facsimile. The examiner's amendment corresponds to the clean copy of claim 1.
